SUMMARY

Technical systems analyst and application developer with three years of experience building, supporting, testing, and deploying enterprise applications, data solutions, and automated workflows. Known for developing reliable solutions that reduce operational downtime, replace manual processes, and improve the user experience.

EDUCATION

Utah State University, Jon M. Huntsman School of Business — Logan, UT

Bachelor of Science, Management Information Systems — *December 2024*

TOOLS

Technical Languages:	Platforms:			Collaboration Tools:
- SQL	- Tableau Desktop	- Jupyter Notebook	- Docker	- Git
- Python	- Snowflake	- Power Automate	- PostgreSQL	- JIRA
- R	- Workday	- Power Apps	- SSRS	- Confluence
- JavaScript	- SAP	- SQL Server	- HTML/CSS	- ServiceNow

PROJECTS

ATLAS Align | Express, JavaScript, PostgreSQL, Docker, Node — *2026*

- Designed web app to standardize audit development and documentation, reducing effort by 10+ hours per audit.
- Deployed in Studioshare, using PostgreSQL database to support shared audit state across multiple users.
- Defined acceptance criteria with stakeholders, converting operational needs into application enhancements.
- Created technical documentation, validation procedures, and support processes for application deployment, testing, and maintenance.

Walt Disney World Trip Planner | Python, Object-Oriented Programming — *Capstone Project, 2023-2025*

- Built Python app to plan an "optimal" trip to Walt Disney World, using data to recommend strategies to minimize waiting time by forecasting park crowds based on 5+ determinants.

WORK EXPERIENCE

The Walt Disney Company — Orlando, FL

HRIS Analyst — *September 2025 - Present*

- Define requirements, resolve support incidents, and deploy 12+ ongoing and ad hoc audit reports for global stakeholders.
- Minimize operational downtime by developing and supporting production enterprise applications, troubleshooting defects, and automating SQL and Python workflows.
- Investigate data issues, develop SQL solutions involving 3+ HR systems while validating reporting accuracy.
- Partner with developers and technical stakeholders to clarify functional requirements, reproduce defects, validate fixes, and coordinate enhancement delivery.

The Walt Disney Company — Orlando, FL

HRIS Developer Intern — *January 2025 – September 2025*

- Developed Python and PowerAutomate solutions to automate data activities, saving 3-5 work hours weekly.
- Investigated workflow failures and performed root-cause analysis to improve automation reliability.

Jon M. Huntsman Center for Entrepreneurship — Logan, UT

Student Ambassador — *August 2023 – May 2025*

- Mentored 50+ students and delivered weekly presentations for an international entrepreneurship program.

Walt Disney World — Orlando, FL

College Program Intern – Fantasyland West Attractions — *January 2024 - May 2024*

- Operated 3 attractions with minimal downtime, implementing operational procedures to maximize throughput.

LEADERSHIP

SEED Poverty Relief Program — Merida, Mexico & Tarapoto, Peru

Student Intern/Team Lead — *May - August, 2023 & 2024*

- Implemented product analysis and record-keeping processes in 20 small businesses, raising sales by 50%-200%.

PERSONAL INTERESTS

- Theatre Performer (13 productions)
- Spanish (Fluent)
- Planning a trip to Spain
